SOLUTIONS DE PROCHAINE GÉNÉRATION

Don't Waste Money on Old Telephone Technology.
Use Norleaf Networks Telephone Solutions using Voice over Internet Protocol (VoIP) to send Voice and Data over One Network.

Norleaf Networks telephone solutions using Voice over Internet Protocol (VoIP) have the features and reliability that until now were only available with very expensive and complicated telephone systems, but at **50% - 75%** less cost than traditional telephone systems.

Here are some ways Norleaf Networks VoIP telephone solutions can help your company.

- **PRESENT A UNIFIED ORGANIZATION.** Present a unified organization to customers by linking branches, sales or service offices and call centers, anywhere in the world, to a professional, standardized telephone system at the main office.
- **CONNECT MOBILE EMPLOYEES.** Empower mobile employees by providing single access through the network to corporate data and all forms of communication resources such as telephone, fax, email, voicemail, and instant messaging.
- **HAVE CALL CENTRE CAPABILITY.** Drive call center operations with automated call distribution, support for remote agents, and comprehensive management tools.
- **ELIMINATE LONG DISTANCE CHARGES.** Eliminate long distance call charges between office locations by connecting your remote offices, home offices, and mobile staff with your office phone system.
- **ELIMINATE SERVICE CHARGES.** Stop paying service charges for telephone features such as call forwarding, call waiting, call conferencing, and voice mail. You get all these features, and more, when you purchase Norleaf Networks VOIP telephone solution.
- **QUICKLY ADD AND DELETE EXTENSIONS.** Add and delete extensions quickly and cheaply. You can move phone extensions and staff as needed without concern of phone location or paying high cost of having a technician come to your office to reprogram the extension.
- **EASILY PERFORM UPGRADES AND MAINTENANCE.** Norleaf Networks VoIP telephone solutions are flexible and scalable to meet your future business needs. We can add new features with little or no disruption in service and perform most maintenance and upgrades remotely.

Contact us for more information about how Norleaf Networks VoIP telephone solutions will save you money, keep you connected to your customers, and unify your organization.
